RMJM Announces the Opening of a New Studio in Mantova, Italy

RMJM is pleased to announce the opening of RMJM Mantova, a new multidisciplinary architectural studio based in Mantova, Italy.

The studio brings together local European expertise and the international knowledge, resources and specialist capabilities of the wider RMJM network. It will provide integrated services across architecture, master planning, urban design, landscape architecture, interior design, construction supervision and project management.

RMJM Mantova will work across the full project lifecycle, from early-stage concept development and design competitions through technical coordination, BIM delivery and construction documentation. Its approach combines creative ambition with contextual understanding, technical feasibility and close collaboration between disciplines.

The studio is led by Principals Luca Aldrichi, a registered architect with more than 20 years of international experience across Europe, Asia and the Middle East, and Abhinav Goel with an international team of architects, urban designers, interior designers and technical specialists. Luca is also a professor at Politecnico di Milano and is registered with the Ordine degli Architetti di Mantova.

"The opening of RMJM Mantova represents an exciting new chapter for our team. Mantova offers a unique environment in which architectural heritage, education and contemporary design come together. Our ambition is to create thoughtful, innovative and technically rigorous projects that respond meaningfully to their context and to the people who use them," said Luca Aldrichi, Principal of RMJM Mantova.

The team brings experience across educational, cultural, mixed-use, residential, commercial, hospitality, sports and large-scale master-planning projects. Its international portfolio includes Dushanbe Tower and Congress Hall in Tajikistan, Sanko Headquarters in Istanbul, Gdynia Mixed use in Poland, Berhan Bank Headquarters in Ethiopia, the Architecture and Design Museum competition in Helsinki, the Beach Plaza Hotel in Montecarlo and the Quay Side District in Malaysia.

Through its multidisciplinary team with over 10 different nationalities and close relationship with Politecnico di Milano's Mantova campus, RMJM Mantova will focus on architecture that balances design identity, sustainability, cultural sensitivity, user experience and long-term functionality.

The launch reinforces RMJM's commitment to growing its European presence while providing clients with locally informed expertise supported by the capabilities of an established international architectural network.

About RMJM

Founded in 1956 by Sir Robert Matthew and Stirrat Johnson-Marshall, RMJM has evolved into one of the most globally connected and culturally diverse architecture practices in the world. With studios across five continents, RMJM unites a collective of thinkers, designers and specialists driven by a shared purpose: to shape environments that empower vision and unlock human potential.

As Architects of Ambition, we work with clarity and intention – balancing global perspective with local insight, and precision with imagination. Our networked approach enables us to respond faster, think deeper and design with a level of refinement that has defined RMJM for more than 70 years.

Today, RMJM continues to build on its legacy with an architectural language rooted in intelligence and timeless design principles.
